

How do I subscribe to different publishers?

Written by Gregg Campbell

The real power of RaceStatus® is in its subscription capabilities.

In order to subscribe to a publisher you will need to become a member by [signing up here](#) .

When you are a member and you are logged in to RaceStatus® there is a "RaceStatus® User Profile" menu on the left side of our pages. In order to view your current subscriptions you need to click on "View Your Profile." There are two tabs in your profile related to your RaceStatus® subscriptions. The first tab, "Delivery Options", provides you a list of items related to how your publishers communicate with you. The second tab, "Subscriptions", contains a list of your current subscriptions.

If you would like to add or remove subscriptions then you need to click on "Update Your Profile." Again you have two tabs here that are related to your RaceStatus® subscription. You can make changes to how your publishers communicate with you on the "Delivery Options" tab. To add or remove subscriptions use the "Subscriptions" tab. On the "Subscription" tab you will see your current subscriptions listed.

To unsubscribe from a publisher simply click on the check box next to that publisher to remove the check. After you press the "Update" button at the bottom of the screen any publishers you have "unchecked" will be removed from your subscriptions.

To add more subscriptions you need to perform a search to find the publisher you want to subscribe to. RaceStatus® provides you many options to help find publishers. The search option allows you to perform a free text search for publishers that either begin with or contain the text you enter. You can also filter the selections by state, type of racing, vehicle class, series, tracks, teams, etc. You should be aware that you must perform a search or select some criteria before any publishers show up in the available publishers list. Having a publisher available in our publishers list does not mean that they are actively publishing using our service.
